SUMMARY

Creative and detail-oriented Frontend Developer with a strong foundation in graphic design and a passion for crafting visually appealing, user-friendly, and interactive web applications. Experienced in building responsive websites and modern interfaces using React, JavaScript, HTML5, and CSS3, with additional expertise in 3D effects, animations, and UX/UI design principles.

EXPERIENCE

Personal Task Tracker App

React, Context API, Vite, JavaScript, Local Storage, GSAP, Framer Motion
- Built a responsive task management application with add, edit, delete, and filter by status functionality.
- Implemented data persistence with Local Storage for state retention after page refresh.
- Designed a clean, mobile-first interface using CSS Modules.

PROJECTS

Futuristic Matrix-Inspired Portfolio Website

React, Tailwind CSS, GSAP, Framer Motion, Three.js, Vite
- Designed and developed a portfolio website with dark aesthetics, 3D effects, and vibrant "digital rain" animations for a cyberpunk look.

Space Tourism Multi-Page Website

React, HTML, CSS, JavaScript, Vite
- Built a fully responsive, multi-page site from Figma designs.
- Implemented tab navigation, hover effects, and adaptive layouts for multiple device sizes.

EDUCATION

Frontend Development Bootcamp – Creative Hub, Skopje
Completed: 2024
- Intensive training in HTML, CSS, JavaScript, React, and modern frontend workflows.

Bachelor's Degree in Graphic Design – Faculty of Fine Arts, Ss. Cyril and Methodius University, Skopje
Graduated: 2022
- Specialized in visual communication, typography, branding, and digital/print design.
